Objective

I am an architect with 5 years of experience who began transitioning into Programming one year ago. I'm now seeking an opportunity to grow professionally in the front-end field, apply the skills I've gained, and contribute to real-world projects as part of a collaborative team.

Education

Bachelor of Architecture

Sept 2014 – May 2019

- Faculty of Fine Arts, Architecture Department – Alexandria University, Egypt
- Graduated with Good grade

Experience

Programming and Development Skill

Aug 2024 – present

-Programming Fundamentals

- Programming fundamentals using C++, including variables, loops, and conditions, with a strong grasp of memory management, and practiced essential data structures (arrays, stacks, queues, linked lists) and algorithms (sorting, searching, recursion).

-Front-End Development

- Built responsive and interactive web pages using HTML, CSS, and JavaScript, including DOM manipulation and dynamic UI updates.
- Used Bootstrap and Material UI to design modern, mobile-friendly layouts.
- Developed single-page applications using React.js and managed state with Redux.
- Integrated RESTful APIs and worked with HTTP requests and data handling.
- Practiced unit testing in JavaScript using Jest, and used Postman to test RESTful APIs
- Used Git and GitHub for version control in multiple projects

Professional Experience (Architecture)

January 2020 - present

- Joined the technical office team at **Talaat Moustafa Group** – New Administrative Capital
- Contributed to technical office work at **Concrete Plus** – Alamein
- Currently working at a quantity surveying office focusing on **material takeoff** and **cost estimation**

Projects

- GoBuy "E-Commerce" (React, React Router, FireBases, Pagination , React Bootstrap) -In Progress-
- ReposHub (React, REST API, Pagination ,Material UI) - [ReposHub](#) [↗](#) [TheReposHub.netlify](#) [↗](#)
- Weather App (React, REST API, React Router ,Material UI) - [Weather-App](#) [↗](#) [weatherappaz.netlify](#) [↗](#)
- ToDo List (React, Material UI) - [React-ToDoList](#) [↗](#) [todolistuesignreact.netlify](#) [↗](#)
- Simple ToDo App (HTML, CSS, JavaScript) – [Simple-ToDoList](#) [↗](#) [github.io/To-Do-List/](#) [↗](#)
- Quiz App (HTML, CSS, JavaScript) – [quiz-app](#) [↗](#) [github.io/quiz-app//](#) [↗](#)
- Guess Word Game (HTML, CSS, JavaScript) – [Guess-Word](#) [↗](#) [github.io/GuessWordGame](#) [↗](#)

Skills

- Languages: C++, HTML, CSS, JavaScript
- Libraries and Tools : React, Redux, React Router, Material UI, Bootstrap, Git, GitHub, Postman
- Concepts: Memory management, DOM manipulation, RESTful APIs, problem solving and routing (public / private), authentication, and handling of React forms
